New products

We work very closely with our customer network to continuously improve the products we offer, and to seek out new opportunities both from a product and support perspective. In this catalogue you will find several new products - look out for the New! symbol.

TipFinder – find the right tip for your pipette

Did you know STARLAB tips fit most pipettes on the market? To help you find the perfect match for your pipette, we created the STARLAB TipFinder.

STARLAB TipOne® pipette tips offer a wide range of choice with standard TipOne® pipette tips, TipOne® Filter Tips or TipOne® RPT. To find the right tip for your pipette, visit www.starlab.click/tipfinder

Try before you buy

We are confident that our consumables will meet your research needs, but also understand you may wish to test a product before using it long-term for your valuable research. That's why we offer our customers the opportunity to Try Before You Buy!

www.starlab.click/samplerrequest

StarGuardselect

Let us help you select the right glove for the job in hand. STARGUARDselect can help you make the right decision by providing information on each glove's chemical breakthrough times.

STARGUARDselect will provide you with your personal protection solution in just a few clicks.

Get **Green** with STARLAB!

STARLAB prides itself on being a green company. We work on long-term strategies to reduce the company's impact on the environment for both the products we produce and the day-to-day running of the business. All aspects of the business which have an environmental impact are continually monitored with the view to reducing that impact by 5% each year. STARLAB was one of the first UK companies within its sector to obtain ISO 14001 certification for Environmental Management.

STARLAB is committed to promoting sustainability in science. Our green ideas start with our **"reduce, reuse, refill, recycle"** philosophy for the Research and Development of greener products.

Our market-leading TipOne® pipette tip system is at the forefront of our green initiatives and is designed to reduce plastic waste; the tip rack is reusable with plastic-saving refills and all components of the system are recyclable.

STARLAB continually reviews all our processes to ensure we maintain and implement good, sustainable business practices. Our aim is that our commitment to reducing our impact on the environment will help our customers achieve their own sustainable purchasing objectives.

GREEN ENERGY
Sourced from wind power for TipOne® manufacturing

SMART PACKAGING
Packaging of StarGuard®
COMFORT: 250 gloves in same size box as 100 gloves in conventional packaging

BULK BUY
Save on packing resources and transport emissions by buying the case

RECYCLE
Your used STARLAB products.

REDUCE

Up to 40 % plastic material saved for our new generation TipOne® tips

REUSE

TipOne® racks withstand repeated autoclave cycles while retaining stability, strength and shape.

REFILL

Save plastic waste and money by using our TipOne® REFILL

DUAL USE

Upcycle TipOne® racks into any creative idea you can think of

- **STARLAB locations:**
France, Italy, United Kingdom and Germany.

Total Liquid Handling

STARLAB are liquid handling experts. We have many years' experience in automated injection moulding processes for the manufacture and sale of high quality laboratory consumables for research and development.

With TipOne® we have developed one of the world's leading pipette tip system. STARLAB manufactured products are in daily use in laboratories throughout the world and have a proven track record of performance and reliability.

We have earned an excellent reputation within the research community as a consultative company who takes a structured approach to Liquid Handling products and support.

We work very closely with our customer network to continuously improve the products we offer, and to seek out new opportunities both from a product and support perspective.

Reuse, Refill, Recycle!

----------------------	----

The Trusted Tip

TipOne® is the original refillable, re-usable and recyclable pipette tip system. Recent improvements to the design of the system, based on customer-feedback, is why TipOne® is one of the leading tips for research labs.

Convenience and quality are at the heart of the system and TipOne® remains the same tip that you have used and trusted over the years.

Latest Technology! **Manufacture**

The use of multiple cavity tools for the injection moulding process guarantees high conformity within one batch. The automated moulding and assembling procedures are carried out under clean-room conditions to eliminate contamination.

Intensive! **Quality Control**

Automated Quality Control procedures ensure that TipOne® is inspected for 100% performance. Every TipOne® product is certified RNase, DNase, DNA and Pyrogen free.

Sterile TipOne® tips have been validated according to EN ISO 11137-2:2007.

Unique collar

Our newest tips can be recognised by the jagged design on the tip collar.

TipOne®

Proven! **Material**

All TipOne® tips are manufactured from pure, virgin polypropylene to ensure the highest quality product.

Excellent! **Filter**

The TipOne® filter is one of the best on the market and protects against aerosol cross-contamination without trapping your valuable samples. The filters contain no additives to interfere with samples. For more info see pages 14–15.

* TipOne® tips in all packaging units Rack, Refill-System, Stack-Rack, Bag and Filter-Refill are designed and constructed for low-contamination transfer of liquids, in particular for samples from the human body and for reagents within the scope of an in-vitro diagnostic application in order to allow the in-vitro diagnostic device to be used as intended. The above mentioned TipOne® are in-vitro diagnostic devices according to Directive 98/79/EC of the European Parliament and the Council dated October 27, 1998. They are intended exclusively for single use and for application by qualified staff.

2

Thin-walled tip collar

The flexible tip collar fits all popular pipettes, even those with worn tip holders! Thin-wall technology ensures a perfect seal while also reducing the loading and ejection forces.

Universal!**One tip fits all**

The tip collar is engineered to fit all popular pipettes without any loss of accuracy or precision.

Green tip design

A reduction of up to 40% in the material used for the production of TipOne® tips helps to save valuable resources and is beneficial for the environment.

Thin-walled tip

The use of the latest injection-moulding processes produces high-precision, thin-walled tips with excellent clarity for better visibility of your samples.

Brilliant!**Highly polished moulds**

For an extremely smooth surface to reduce sample retention.

Low Retention!**TipOne® RPT**

For improved flow dynamics of sticky liquids. For more information see pages 16–17.

UltraPoint orifice

Prevents sample hang up and makes it easier to touch-off the last drop of sample.

A System with a System!

One System, One Solution!

The TipOne® system is reusable, refillable and recyclable and every part of the system is interchangeable with the rest.

Compact, durable and green design

TipOne® is designed to be a green system. Our refill design reduces the amount of raw materials needed for its manufacture, resulting not only in less consumption of resources, but also the lowering of CO₂ emissions during production and transportation. Not only is this more environmentally-friendly, its compact design also helps save valuable storage space in your lab. The remarkable durability of our racks means they can be reused with the refill again and again, even if autoclaving, without any loss to their stability

or shape. All components of the TipOne® system are made from pure polypropylene (PP) for easy recycling where no separation of materials is required.

Intelligent quality

For us, providing you, the user, with all the information you need while you are pipetting at the bench is "Intelligent Quality". Our tip wafer contains all the useful information on the tips that it holds.

Clever

A 2D matrix code on each wafer allows full traceability of item and lot number, which is ideal for labs using Laboratory Information Management Systems (LIMS).

Experience tells us that our racks are refilled many times and having this information on the wafer avoids errors when racks are refilled with a different type or volume of tip.

Colour coded wafers for easy volume identification

Colour-coded wafers provide fast and easy volume identification at a glance

Simple!

The system comprises **two racks only**: one small, one large. Small rack for use with tip volumes 10 µl to 300 µl; large rack for use with tip volumes 1000 µl and 1250 µl.

Using our refills and reusing our racks could not be easier.

TipOne®

System Components Overview

The Perfect Rack

The perfect Rack

The rack is at the heart of the TipOne® pipette tip system:

- ▶ Made from pure polypropylene for excellent stability and durability
- ▶ Optimised base geometry and centre of gravity provides secure and precise handling
- ▶ Available in two sizes: small for tip volumes 10 µl to 300 µl and large for 1000 µl and 1250 µl tips
- ▶ Tip information is printed directly on the wafer, so you always know the volume and type of tips you are using, whether the tips were originally racked, or the rack is being reused with a refill.
- ▶ All components made of recyclable polypropylene

1. Lid opens at an optimised angle for unrestricted access
2. Wafer locks securely into the rack for stability during pipetting
3. Stackable
4. Reusable, autoclavable and recyclable

Remarkable durability

Autoclavable

Designed for prolonged and repeated use, TipOne® racks withstand repeated autoclave cycles while retaining stability, strength and shape. Autoclave with the lid closed and reduce the number of autoclave cycles by saving space in the autoclave and energy costs.

Stackable

The racks are designed to stack safely on top of one another to help save valuable lab space.

Ideal for multi-channels

Unrestricted multi-channel access is provided by the optimised opening angle of the lid and the design of the wafer. The rack's base geometry and centre of gravity provides stability and the sturdy wafer ensures a secure tip fit across all channels.

Reusable

Reuse the racks over and over with the easy to use refill system. This will reduce the amount of new plastic coming into your laboratory and minimise the plastic for recycling.

The **Clever** Refill

The clever Refill

A quick and easy way to obtain economical racked tips.

- ▶ Supplied in two individually-wrapped stacks of five wafers
- ▶ Tip information printed on the wafers can be seen easily without having to expose the tips.
- ▶ Spacers between the layers protect tips from contamination (10/20µl, 300µl and 1000µl volumes only)
- ▶ Once racked, the refills can be autoclaved
- ▶ All components made of recyclable polypropylene

1. Space saving
2. Autoclavable, once racked
3. Eco Friendly
4. Tip info printed on every wafer
5. Recyclable

The **Unique** Filter Tip Refill

The unique Filter Tip Refill

Provides an economical and eco-friendly alternative to racked sterile filter tips.

- ▶ Quick and easy to load
- ▶ Individually wrapped
- ▶ Sterility is not compromised during racking
- ▶ Space saving - using sterile filter refills to reload racks directly during long periods in hoods and PCR workstations saves up to 20 % precious space
- ▶ All components are made from easy to recycle polypropylene

1. Economical
2. Tip info printed on wafer is visible before and after being unwrapped
3. Top and bottom shells protect integrity of sterile product
4. Space Saving and Eco Friendly
5. Recyclable

The **Compact** Stack Rack

The compact Stack Rack

The Stack Rack provides 960 tips in one convenient and compact unit.

- ▶ Wide base for great stability
- ▶ Excellent choice for multi-channel use
- ▶ Transparent lid protects the tips when not in use
- ▶ Tip information printed on the wafers can be read easily through the transparent lid without having to expose the tips
- ▶ Autoclavable
- ▶ All components are made from easy to recycle polypropylene

1. Compact
2. Autoclavable
3. Recyclable
4. Stable design
5. Reusable

The **Self-Standing** Bag

The self-standing Bag

Economical – ideal for teaching labs or non-critical work

- ▶ Self-standing bag for easy and convenient access and storage
- ▶ Tamper-proof, easy-open perforation strip on bag
- ▶ Resealable zip-lock for safe, contamination-free storage
- ▶ Recyclable

1. Resealable
2. Self-standing for easy access
3. Recyclable

Racked and Filter Refill TipOne® products are supplied in these easy to stack shelf boxes (960 Tips).

Be green and buy by the case (part numbers ending with -C). Ordering by the case saves on packing materials and reduces transport emissions.

All TipOne® tips are certified RNase, DNase, DNA & Pyrogen free. The tips are designed to fit all popular pipettes without any loss of accuracy or precision.

 www.starlab.click/tipone

TipOne® Filter Tips

Nothing goes through!

Protect your samples against unwanted contamination by using TipOne® filter tips. During pipetting, it is not possible to see with the eye if fine aerosols are going into your pipette. If they are, those aerosols can contaminate other samples at a later date. The TipOne® filter protects against aerosol cross-contamination without trapping your valuable samples.

TipOne® filter tips contain no additives to interfere with your samples and are one of the best filters available on the market. They are proven* to block >99 % of aerosols. The results, shown below, speak for themselves!

Filter Tip features

- ▶ Highly effective HDPE filter
- ▶ Filter contains no additives to interfere with your samples
- ▶ The filter will not absorb samples, allowing recovery if necessary
- ▶ Sterile, and RNase, DNase, DNA and Pyrogen free

Blocking of Particles (diam. approx. 100 nm) [%]
TipOne® filter tips compared to other manufacturers' filter tips*

*The comparative tests were conducted in 2018 in an independent test institute with filter tips from other leading manufacturers.

TipOne® Filters

TipOne® filters are made from high density pure polyethylene. They contain no additives which can interfere with your sample. The filters are hydrophobic and will not absorb your samples the way sealing filters do, allowing recovery of your valuable samples if necessary.

TipOne® RPT

Leading manufacturer's low retention tip with green food dye

TipOne® RPT with green food dye

RPT: A technical breakthrough!

STARLAB's Repel Polymer Technology (RPT) optimises conventional polypropylene surfaces to improve the flow of 'sticky' liquids.

STARLAB's TipOne® RPT tips have no coating to interfere with your sample and offer an extremely hydrophobic surface.

All TipOne® RPT tips are certified RNase, DNase, DNA and Pyrogen free.

TipOne® tips are designed to fit all popular pipettes without any loss of accuracy or precision.

TipOne® RPT tips are supplied in the same style packaging as other TipOne® tips. Therefore, the RPT refills and filter refills can be used in the racks from all other TipOne® tips, and vice versa!

RPT Tip Features

- ▶ No coating! Made from 100% pure polypropylene
- ▶ Improved sample recovery
- ▶ Reduced DNA binding
- ▶ Autoclavable
- ▶ Universal! Fits all popular pipettes
- ▶ Reusable, refillable and recyclable system

TipOne® Recycling

We can ALL do our bit to help the environment ...

► **Reuse the TIP RACKS with the REFILL**

TipOne® is designed as a reusable system and all racks within the system (standard tips, filter tips and TipOne® RPT) can be reused with both the standard and filter tip refills.

► **If plastics recycling is available at your account, INCLUDE the TipOne® packaging**

All components of the TipOne® system are made from polypropylene (PP), so the rack, the refill wafers, and the refill's spacers and top and bottom shells, can all go into the same recycling bag or bin at your site.

What WE do to help the environment ...

As a manufacturer, STARLAB has control over the design and manufacture of its products. Our green ideas start at the design stage, and our research and development team is constantly looking at ways to more efficiently manufacture greener products. As an innovative company, STARLAB has become a green leader in its field, setting the environmental standard for others to follow.

TipOne® Repeat Dispenser Tips

Dispenser Tips you'll want to use again!

This range of high quality dispenser tips have a polypropylene cylinder and a polyethylene piston. The extended piston length of most tips minimises dead air volume, improves reagent delivery and provides easier access to narrow vessels.

Features

- ▶ Up to 100 dispenser steps with Multipipette® Plus
- ▶ Separate, colour-coded adapters for 25 ml & 50 ml tips
- ▶ Lower dispensing forces
- ▶ High accuracy and precision
- ▶ ISO 8655 manufactured

Robotic Tips Overview

STARLAB robotic tips are engineered to the same specifications as the original, equipment manufacturer's tips to ensure both compatibility and a consistent fit. Don't risk having your time and results compromised with defective materials and poor performance!

With STARLAB, you can put your trust in disposables from a company that offers much more than just tips.

All robotic tips are certified RNase, DNase and DNA free.

Quality Control

Quality Control is the essential factor which gives you the freedom to walk away from your automated workstation and get on with other tasks. You need the assurance that the tip will not let you down. STARLAB robotic tips are put through stringent and thorough testing. Every lot of tips is subject to an array of demanding tests, from the geometry of the tip itself to automation-specific requirements such as clean ejection from the liquid handling head. Every lot is required to meet or exceed the parameters necessary to give you that confidence to walk away. Tips are tested on the original robotic equipment so there is no doubt they will perform to the same requirements as the disposables from the robot manufacturer themselves.

No special set-up required!

STARLAB robotic tips require no instrument hardware or software adjustment, thereby providing a simple, safe and direct high-performance substitute. We recommend to request samples of robotic tips to verify compatibility with your system.

Purchasing flexibility

STARLAB likes to make things as simple as possible for its customers. We realise that you may need to order robotic consumables in large quantities, but may not have the space to store them. STARLAB can help with call-off orders where you buy and own the product, but we store it in our warehouse and 'call off' delivery to you, as and when you need it. Alternatively, you may place a standing order and have a pre-determined quantity delivered at regular intervals. Contact us to discuss your options.

Recycle your Robotic Tip Racks

Robotic tips racks are made from polypropylene and can be recycled using the same method you use for our TipOne® racks.

See page 18 for more information on the different recycling options available.

Robotic Reservoirs

High quality for high throughput!

STARLAB reservoirs conform to the standard SBS footprint for compatibility with most robotic systems. They have virtually no dead volume. The sturdy polypropylene construction ensures rigidity during automation and excellent chemical resistance.

All robotic reservoirs are certified RNase, DNase and Pyrogen free.

ErgoOne® Pipettes: Overview

Setting the new standard in pipetting

Everyday, pipettes are confronted with multiple tasks that must be exact and precise. Reliability is key in the laboratory and your pipette must be trusted to perform well, day in, day out.

As one of the most frequently used instruments in the laboratory, pipettes must also be comfortable to use and provide the features you need. ErgoOne® pipettes combine researcher-requested features with the latest ergonomic principles to provide optimum performance. ErgoOne® gives you accuracy and precision you can trust, with a stylish new look you will love.

Lightweight and extremely easy to use, ErgoOne® can be trusted to provide accurate and precise pipetting all day, every day. Use with STARLAB's TipOne® pipette tips for the perfect pipetting partnership.

ErgoOne® is designed to fit all popular pipette tips without any loss of accuracy and precision.

All ErgoOne® pipettes are sold with a 3-year warranty.

ErgoOne® Features

- ▶ Minimal operating forces
- ▶ Lightweight ergonomic design
- ▶ Colour coded
- ▶ Volume lock
- ▶ Universal tip fit

1. Easily removable lower part for fast cleaning
2. Wear-resistant polymer tip holders
3. Tip ejector with integrated cascade to lower the tip ejection force

ErgoOne®

1. Colour coding - matches the colour coding of TipOne Tips
2. Ergonomically designed - Finger rest ensures comfort and ease during use
3. Contoured chemically-resistant PP handle
4. Lightweight
5. Fully autoclavable - Can also be UV sterilised
6. Easily removable tip ejector for fast cleaning
7. Universal tip fit!
8. Integral, rust-free tip ejector
9. Reduced diameter tip ejector - For easy access into small tubes
10. Volume display - Positioned so it is visible during pipetting, 4-digit volume display for greater accuracy, for right and left-handed
11. Smooth action tip ejector
12. Volume lock - Prevents drift during use

*The ErgoOne® is designed and constructed for low-contamination transfer of liquids, in particular for samples from the human body and for reagents within the scope of an in-vitro diagnostic application in order to allow the in-vitro diagnostic medical device to be used as intended. This pipette is an in vitro diagnostic device according to Directive 98/79/EC of the European Parliament and the Council dated 27 October 1998. It is intended exclusively for indoor use and for operation by qualified staff.

A great tool to speed up your pipetting process

ErgoOne® multi-channel pipettes are designed in accordance with the latest ergonomic principles. The pipette is extremely easy to use and has minimal operating forces to help prevent hand fatigue. ErgoOne® multi-channel pipettes provide accurate and precise pipetting in a variety of volume ranges.

All ErgoOne pipettes are sold with a 3-year warranty.

Product features

- ▶ Minimal operating forces
- ▶ Lightweight ergonomic design
- ▶ Colour coded
- ▶ Volume lock
- ▶ Universal tip fit

ErgoOne® E Electronic Pipettes

Reliable and ergonomic!

ErgoOne® E single and multi-channel pipettes provide reliable pipetting every day. Ergonomic and lightweight, ErgoOne® E pipettes are perfect for comfortable pipetting during long periods of use.

Five operating modes provide standard and reverse pipetting, mixing and dispensing, plus a unique "Electrophoresis" mode to help you load gels easily. The long lasting battery can also be charged during use so you are never without your pipette.

ErgoOne® E pipettes are sold with a 1-year warranty.

Product features

- ▶ Easy to use intuitive menu structure
- ▶ Lightweight, ergonomic design
- ▶ Adjustable finger rest for individual comfort
- ▶ Significantly reduced tip loading and ejection forces
- ▶ Universal tip fit

ErgoOne^E

1. Ergonomic, easy to reach pipetting button
2. Colour-coded ejector button provides significantly reduced ejection forces
3. Adjustable finger rest - ErgoOne® E pipettes rest easily and ergonomically in your hand. The finger rest is height adjustable to allow the fine-tuning of the hand position for effortless operation of the function buttons
4. Comfortable, ergonomic hand grip
5. Autoclavable pipette shaft
6. Significantly reduced tip loading forces
7. Universal tip fit

*The ErgoOne® E is designed and constructed for low-contamination transfer of liquids, in particular for samples from the human body and for reagents within the scope of an in-vitro diagnostic application in order to allow the in-vitro diagnostic medical device to be used as intended. This pipette is an in-vitro diagnostic device according to Directive 98/79/EC of the European Parliament and the Council, dated 27 October 1998. It is intended exclusively for indoor use and for operation by qualified staff.

Single-channels supplied with battery, AC Adapter and silicone oil. Multi-channels supplied with battery, AC Adapter, individual stand, a rack of TipOne® tips and silicone oil. Final test values related to nominal value which is printed on the device (ie, max. volume) and the indicated volume steps, according to DIN EN ISO 8655. 1-year warranty.				

Easy to read digital display

Large, digital volume display and easy to master intuitive menu structure makes the ErgoOne® E the researcher's choice for easy, everyday pipetting.

Long lasting battery

~4000 pipetting cycles on one charge! Special 'Battery Refresh Function' extends the service life and optimises battery performance. Auto shut-off after 10 minutes of inactivity helps save battery charge.

Can be recharged during use

You will never be without the use of your pipette – the ErgoOne® E can be recharged during use!

ErgoOne® FAST Pipette Controller

ErgoOne® FAST

Efficient pipetting

During development of the ErgoOne® FAST electronic pipette controller, a high pipetting speed was recognised as an important feature. The result is convincing! The ErgoOne® FAST can fill a 25 ml pipette in less than four seconds!

Ergonomy meets modernity

Every aspect of ErgoOne® FAST has been developed with ergonomics in mind. ErgoOne® FAST is one of the lightest pipette controllers on the market. It is designed for comfort and balances perfectly in the hand to provide fatigue-free pipetting, even during long periods.

ErgoOne® FAST is sold with a 2-year warranty.

FAST stands for

Flexible, Accurate & Precise, Safe, Transfer

Product features

- ▶ Intuitive, pressure-responsive speed control
- ▶ Provides fast pipetting with maximum precision
- ▶ Low operating forces
- ▶ Lightweight and ergonomically designed for fatigue-free pipetting
- ▶ Use with all plastic or glass serological pipettes (1.0–100 ml)

Pressure-responsive speed controls

The aspirating and dispensing speeds are easily regulated by pressure-sensitive control buttons. Unlike other controllers, there is no need to select a separate speed setting, thus making the ErgoOne® FAST very flexible and practical to use.

Battery-life indicator

Battery status display uses traffic light system for easy, visual identification.

Modern battery technology

Completely charged, the battery can perform 2000 x 25 ml dosing cycles. The Lithium-Polymer battery technology guarantees a constant pipetting speed that will not diminish as the battery charge declines. Additionally, the battery is easy to replace!

Precise handling of pipettes

ErgoOne® FAST with serological pipette

StarPet Filler (Manual)

DEMO MODELS
TRY
before you
BUY
available on request

Use with all plastic or glass pipettes, 1.0 ml to 25 ml. This manual pipette filler has an exceptionally smooth operation. Two dispense modes: one delivers fast filling with optimal accuracy for 10 ml to 25 ml pipettes; the other is for use with 1.0 ml to 10 ml pipettes where accuracy can sometimes be difficult to control. Compatible with Blow-Out, 'To Deliver' (TD) or gravity dispense pipettes.

Product features

- ▶ Use with all plastic or glass pipettes, 1.0 ml to 25 ml
- ▶ Exceptionally smooth operation
- ▶ Autoclavable silicon pipette holder

Serological Pipettes

New!

Discover the possibilities!

The pipettes are constructed from polystyrene for sterile serological and tissue culture applications. Colour-coding on both the pipettes and the packaging provides easy identification. The black printed, easy to read ascending and descending graduations simplify fluid measuring and dispensing, and all pipettes (excl. 100 ml) feature negative graduations for extra working volume. Perfect for use with all popular pipette controllers, including ErgoOne® FAST.

Product features

- ▶ Accuracy $\pm 2\%$
- ▶ Bidirectional graduations provide added applicability
- ▶ Non-cytotoxic and non-haemolytic USP Class VI polystyrene
- ▶ Gamma sterilized to SAL 10^{-6} (ISO11137)
- ▶ Certified RNase, DNase, latex and pyrogen free

RepeatOne® Dispenser

Rapid dispensing!

RepeatOne® is a hand-held device for repetitive and rapid dispensing of volumes 2 µl to 5 ml.

Compatibility

RepeatOne® can be used with the following dispenser tips:

- ▶ STARLAB TipOne® Repeat Dispenser Tips
- ▶ Brand®
- ▶ Gilson®
- ▶ HTL®
- ▶ Ritter®

Product features

- ▶ Up to 48 dispenses from the same sample
- ▶ Locking clamp holds the dispenser tip securely in place
- ▶ Conforms to EN ISO 8655 Piston-Operated Volumetric Apparatus
- ▶ Conforms to ASTM E1154-89 (2003) Standard Specification for Piston or Plunger Operated Volumetric Apparatus
- ▶ 2-year warranty

STARLAB Pipette Servicing

Accredited pipette service and repair services

Our Pipette Service for all brands of pipettes offers competent "all-round service" from one source.

High-ranking satisfaction of our customers is based on our superior quality and speediness as well as a result of 10 years experience in calibration and repair services.

Your benefits at a glance:

- ▶ DAkkS accreditation according to ISO 17025
- ▶ Certification according to ISO 9001, 14001 and 13485
- ▶ High quality and swift turnaround for all brands of pipettes
- ▶ Single and multi-channel pipettes, manual and electronic, dispensers, pipette controllers and bottle-top dispensers
- ▶ Certificates of Calibration as hard copy or electronically on request
- ▶ On-Site service

Services & Solutions

- ▶ Pipette disassembly and inspection
- ▶ Leak test
- ▶ Replacement of worn parts
- ▶ Internal & external cleaning
- ▶ Calibration according to ISO 8655 and DKD-R-8-1
- ▶ Certificate of Calibration

Accredited calibration laboratory

The precise and accurate function of pipettes and dispensers are irreplaceable in your daily laboratory routine. In order to meet our quality standards, our calibration laboratory of STARLAB International GmbH has been accredited according to ISO 17025 by the Deutsche Akkreditierungsstelle (DAkkS). You can be utterly sure that this accreditation meets the highest international standards.

Moreover, STARLAB International GmbH is certified according to ISO 9001, 14001 and 13485 and we conduct regular internal and external audits.

Microcentrifuge Tubes

TubeOne® microcentrifuge tubes

TubeOne® tubes stay sealed during boiling, freezing or centrifuging, and are still easy to open afterwards! Optically clear without compromising structural integrity, the tubes feature a frosted writing surface.

TubeOne® tubes are made from pure polypropylene and are manufactured with state of the art production equipment housed in a positive pressure HEPA filtered environment. No processing additives such as slip agents, biocides or antistatic agents are used during production. Your samples remain protected from potential bioactive contaminants.

Features

- ▶ Conservatively rated to 20,000 x g, but will perform to higher specification under optimal conditions
- ▶ Supplied in resealable bags
- ▶ Save on autoclaving with the convenient mini-packs
- ▶ Temperature range: -80°C to 121°C
- ▶ Autoclavable
- ▶ Certified RNase, DNase, DNA and Pyrogen free

TubeOne®

Did you know?

100 TubeOne® tubes fit nicely into a Large TipOne® rack for safe storage or for autoclaving. Or save on autoclaving costs by buying the convenient mini-packs!

¹⁾Mixed packs contain following colour tubes: blue, green, red, violet and yellow.

Microcentrifuge tube leak test

Does your tube maintain a seal while heating? Although a tube may remain closed, evaporation can occur when a seal is incomplete. TubeOne® passes the test with no leaks!

Water-sensitive paper has a special-coated yellow surface that turns blue when exposed to moisture. This indicating paper (A) was placed across the top of TubeOne® (B) and other brands of tube (C–H), all containing 1.0 ml of 50% ethanol and incubated at 95°C for 15 minutes in a dry bath with a tightly closed lid. Tubes C–H showed varying levels of failure.

Microcentrifuge Tube Accessories

ORDER INFORMATION				
		For Use with	Pack Size	Cat. No.
	Cap Locks: Reusable cap locks to securely seal tubes for rigorous boiling/freezing. Assorted colours for easier sample identification. Compatible with 'Crystal Clear' Microcentrifuge Tubes.	0.5 ml Tubes	100	E1405-9000
		1.5/2.0 ml Tubes	100	I1415-1508
	Tube Openers: For use with all microcentrifuge tubes, 0.5 ml to 2.0 ml. Also aids the safe opening of glass ampoules.	0.5 ml to 2.0 ml Tubes	100	I1400-1008
	Microtube Pestles: Disposable polypropylene pestles. Ideal for homogenising cells or resuspending DNA or protein pellets. Certified RNase, DNase and DNA free.	0.5 ml Tubes	10	I1405-4390
		1.5/2.0 ml Tubes	10	I1415-5390

All Cap Locks, Microtube Openers and Microtube Pestles are supplied in mixed packs of blue, green, orange, red, pink and yellow.

Preparation Tubes

Do you need to prepare samples up to 5.0 ml but don't want to use 15 ml tubes? Then use our 5.0 ml preparation tubes!

- ▶ Ideal for biological or chemical solution preparation
- ▶ Suitable for microbial incubation and pellet preparation
- ▶ Black tube for light sensitive reactions
- ▶ Made from virgin polypropylene, the tubes are graduated at 1.0 ml intervals
- ▶ Frosted writing areas on cap and side of tube
- ▶ Temperature use: -80 °C to 121 °C
- ▶ Autoclavable
- ▶ Centrifugation rate: 6000 x g
- ▶ Certified RNase, DNase, human DNA and pyrogen free

Assembled sterile tubes & caps

- Sterile, ready-assembled tube and cap packs
- Supplied in convenient, resealable mini pouches which stand up on your bench
- Suitable for many applications from sample storage in the **gas phase of liquid nitrogen** through freezer to boiling
- Routinely tested to 20,000 x g
- Certified RNase, DNase, DNA, PCR Inhibitor and endotoxin free

Ready-assembled sterile tubes and EasyGrip Caps

E1420-0314

High Impact Screw Cap Microtubes

High impact tube specially formulated for bead-beating applications

Shatter resistant, semi-opaque polypropylene tube with natural, polypropylene screw cap with ethylene-polypropylene o-ring inside.

Supplied ready assembled.

- Temperature use: -80 °C to 121 °C
- Autoclavable
- Routinely tested to 15,000 x g
- Certified RNase, DNase, DNA and PCR Inhibitor free
- Endotoxin-free

2.0 ml Graduated, High Impact Screw Cap Microtube	200	E1420-2641

Cryogenic Vials

Cryogenic Vials for the storage and transportation of biological material.

- ▶ Made from 100 % polypropylene
- ▶ For storage down to -196 °C;
should only be used in the gas phase of liquid nitrogen
- ▶ Internal threaded vials with a silicone seal in cap for the highest possible impermeability
- ▶ Skirted vials lock into racks for easy single-handed work
- ▶ White writing area and highly-visible black graduations at 100 µl increments
- ▶ Sterile and certified RNase, DNase, DNA, PCR Inhibitor and Endotoxin free

Dimensions incl. cap (HxØ): 116.5 x 34.9 mm.		

Culture Tubes

Polypropylene or polystyrene

These disposable sterile tubes can be used for most routine laboratory procedures. They are made from polypropylene (PP) or polystyrene (PS), biologically inert and exempt from mold release agents. High re-

sistance to breakage reduces danger in handling infectious or other potentially harmful cultures. The dual position polyethylene caps can be left loose for aerobic work or sealed for anaerobic culture.

- ▶ 14 ml capacity
- ▶ White writing area
- ▶ Graduations marked at 0.25 ml increments
- ▶ Centrifugation rates: 3000 x g (PP), 1400 x g (PS)
- ▶ Temperature use: -190 °C to 120 °C (PP) / -10 °C to 70 °C (PS)
- ▶ Sterile

ORDER INFORMATION		
Description	Pack Size	Cat. No.
Polypropylene Culture Tube with Cap (Sterile)	20 x 25-Tube Bags	I 1485-0810
Polystyrene Culture Tube with Cap (Sterile)	20 x 25-Tube Bags	I 1485-2810
Dimensions (HxØ) 95 x 17 mm. PP tubes are autoclavable, but only without the cap.		

Microtubes in Rack

Non-sterile product certified RNase and DNase free
Sterile product certified RNase, DNase, DNA and Pyrogen free

Microtubes in rack with removable base

A heavy-duty rack with the same footprint as a standard plate, containing 96 individual 1.2 ml tubes. Each tube is fully supported at the base to withstand the pressures applied by robotic systems. The base of the rack can be easily removed for waterbath applications. Moulded reference grid on lid. Suitable for use in temperatures down to -80 °C.

8-Strip Caps for 1.2 ml Microtubes (Sterile)	120	I 1494-1410
NOTE: PP tubes and racks are autoclavable, but the PE strip caps can not be autoclaved. Rack dimensions with lid (WxDxH): 85 x 127 x 41 mm.		

Organised storage!

- ▶ SBS footprint and compatible with all robotic applications and multi-channel pipetting
- ▶ Ideal for serial dilutions, mixing, storage and harvesting of cells, cell growth assays, DNA screening and long-term storage
- ▶ Interchangeable system offering a wide choice of configurations
- ▶ Rack has clear, printed matrix and transparent lid
- ▶ Temperature use: -80°C to 121°C
- ▶ Certified RNase, DNase, DNA and Pyrogen free

Tube Strips with attached caps

- ▶ Polypropylene PCR strips
- ▶ Attached caps eliminates the possibility of cross-contamination through accidental tube–cap mix up
- ▶ Available in natural, or in mixed packs of blue, green, red, violet and yellow
- ▶ 'X-Clear' flat cap option for qPCR
- ▶ Tubes with individually attached caps can easily be split into smaller sections by snapping the strips apart
- ▶ Supplied in resealable bags
- ▶ Certified RNase, DNase, DNA & PCR Inhibitor free
- ▶ Endotoxin-free

Low-Profile Strips (0.1 ml):
16.0 mm high, for use in cyclers with low-profile capability only.

Standard Strips (0.2 ml):
20.8 mm high, for use in the majority of cyclers.

0.2 ml 8-Strip PCR Tubes, Attached Domed Cap Strip	Natural	125	I1402-2800
Xtra-Clear Flat Caps			
0.2 ml 8-Strip PCR Tubes, Attached Flat Cap Strip (Xtra-Clear)	Natural	125	I1402-2700
0.2 ml 8-Strip White PCR Tubes, Attached, Flat Cap Strip (Xtra-Clear)	White / Natural	125	I1409-2700

White Tubes with X-Clear Caps!

White tubes to maximise reflectance for enhanced signal, combined with Xtra-Clear caps for optimal signal transmission and detection. Ideal for qPCR.

PCR Strips

Non-Flex Strips – stronger strips for easier handling!

Non-flex tubes have a robust, triple link between each tube making them less flexible and easier to handle.

Individually attached caps eliminate the possibility of cross-contamination through accidental cap-tube mix

ups. Available with natural tubes, white tubes (to maximise reflectance for enhanced signal) or with colour tubes (mixed) for colour coded projects. The strips are available in two heights: standard height (0.2 ml) or low-profile (0.1 ml) for optimum temperature balancing and reduced evaporation.

Low-Profile Strips (0.1 ml):
16.0 mm high, for use in cyclers with low-profile capability only.

Standard Strips (0.2 ml):
20.8 mm high, for use in the majority of cyclers.

PCR Discs

One pack of **72-well discs** provides 1728 reactions

One pack of **100-well discs** provides 3000 reactions

Rotor-Gene® Style Discs

These Rotor-Gene® Style Discs are specially made to be used with the Qiagen Rotor-Gene® Q Real-Time Rotary Analyzer.

Two versions are available:

- ▶ **72-well disc of 100 µl tubes** for use with the original Rotor-Disc® 72 Rotor and Rotor-Disc 72 Locking Ring (recommended reaction volume 20–25 µl)
- ▶ **100-well disc of 30 µl tubes** for use with the original Rotor-Disc® 100 Rotor and Rotor-Disc 100 Locking Ring (recommended reaction volume 15–20 µl)

The discs act like a one-piece circular plate with vertically oriented wells for high-throughput use for automated reaction set-up.

Product features

- ▶ Alpha-numeric matrix to aid orientation
- ▶ Certified RNase, DNase, DNA and Pyrogen free
- ▶ Supplied individually-wrapped

Non-Skirted PCR Plates

Non-Skirted PCR Plates

- ▶ Low profile and standard height
- ▶ Opaque black or white available for qPCR
- ▶ Non-skirted plates for a universal fit, suitable for most thermal cyclers
- ▶ Convenient, small pack sizes
- ▶ Autoclavable
- ▶ Certified RNase, DNase, DNA and PCR Inhibitor free
- ▶ Endotoxin-free

Plate Capacities:

Approximate maximum capacity for all 96-well plates is 350 µl for standard height plates, or 200 µl for low-profile plates.

What are my options?

24- and 48-Well Plates

- ▶ 8-Strip Caps
- ▶ PCR Sealing Film Strips

96-Well Plates

- ▶ 8-Strip Caps
- ▶ 12-Strip Caps
- ▶ Sealing Mats for 96-Well Plates
- ▶ Plate Seals (unless plate has raised wells)

384-Well Plates

- ▶ Sealing Mats for 384-Well Plates
- ▶ Plate Seals

8- and 12-Strip Caps

8- and 12-strip caps are manufactured from pure polypropylene, are available flat or domed, and are suitable for use with all 96-well PCR plate. (8-strip caps only can be used on 24- and 48-well plates).

Strip caps allow the convenience of unsealing one row of plate wells at a time. Flat caps enable labelling while domed caps provide the most secure seal when using thermal cyclers with a screw down lid. The 'Perfect Seal'

PCR Plate-Sealing Overview

strip caps give easier attachment to plates without affecting the tightness. Use the flat, 'X-Clear' strip caps in Real-Time (qPCR) applications as these exceptionally clear caps allow the fluorescence signal to pass through.

For ordering details, see page 62.

Sealing Mats

Particularly suitable for sealing plates with defined heated-lid contact pressure, silicone mats are very flexible, autoclavable and reusable.

The mats can also be cut to meet individual needs. Some mats are pierceable to allow access to the sample. Sealing mats are not suitable for Real-Time applications.

For best results, we recommend using only the dedicated mat for your plate. The recommended sealing mat is listed in the ordering table under each plate on pages 66–69.

Sealing Films & Foils Self-Adhesive

Three self-adhesive seals offered by STARLAB are suitable for standard PCR (aluminium, clear polypropylene and clear polyolefin).

The Xtra-Clear Advanced Polyolefin Seal is suitable for Real-Time PCR and the seal's superior optical clarity yields consistent results. **For an optimum and consistent seal across the whole plate, use the seal applicator or sealing brayer on page 73–74.**

Heat Seals

All heat seals offered by STARLAB are suitable for PCR; one of them has superior optical clarity and is suitable for Real-Time PCR.

See page 73 for each seal's specifications and ordering details.

Important Note for Real-Time PCR (qPCR)

Please check that **both the plate AND the sealing option** are suitable for Real-Time PCR applications.

Plates: Please visit www.starlab.click/cycler-compatibility to see which plate is suitable for your Real-Time Cycler.

Strip Caps: Use only 'X-Clear' strip caps on your plates for Real-Time PCR applications.

Plate Seals: Only those seals with superior optical clarity can be used for Real-Time applications. Choose between a self-adhesive seal or a heat seal (page 73).

NOTE: Sealing mats are NOT suitable for Real-Time.

PlateOne® Deepwell Plates

Features

- ▶ Virgin polypropylene
- ▶ Highly visible, printed matrix
- ▶ SBS footprint
- ▶ Barcoded plates available on request
- ▶ Rated up to 5000 x g
- ▶ Temperature use: -80°C to 121°C
- ▶ Autoclavable
- ▶ Supplied in resealable bags
- ▶ Certified RNase, DNase, DNA & Pyrogen free

PlateOne® Microplates

Well-bottom shape indicator code on every plate for easy identification

PlateOne® Microplates are available in three styles, all with a highly-visible solvent-resistant, alpha-numeric matrix. These high-clarity polypropylene plates offer excellent sample recovery compared to polystyrene plates. All plates conform to the SBS standard for compatibility with your automated equipment.

Features

- ▶ Virgin polypropylene plates for reduced sample binding compared to polystyrene plates
- ▶ High chemical resistance
- ▶ Raised wells help prevent cross contamination (96-well plates)
- ▶ Highly visible printed, alpha-numeric matrix
- ▶ SBS footprint
- ▶ Certified RNase, DNase and DNA free
- ▶ Sterile plates are also Pyrogen free

**StarSeals have a minimum temperature use specification of -70 °C but they can be used at -80 °C for short-term storage.

¹ Xtra-Clear Advanced Polyolefin StarSeal E2796-9795 has a low tack-to-touch adhesive. This means that it does not feel sticky when handled, making it is easier to handle so the seal sticks to your plate, not your gloves. The adhesive is pressure-sensitive, so it is only once you have correctly positioned the seal on the plate and you then apply pressure that the seal adheres to the plate. Once bonded, the seal strength is unbeatable.

See the STARLAB website for copy of the Data Sheet detailing the seal's outstanding performance during qPCR against another leading brand.

Polyester PCR Sealing Film, Clear

- ▶ This PCR sealing film offers high performance for robotic applications and extreme conditions
- ▶ Excellent seal minimizes evaporation and well-to-well cross contamination
- ▶ Fit-to-plate dimensions and chamfered corners result in no plate overhang for robotic applications
- ▶ Temperature range: - 40°C to + 120°C
- ▶ Compatible with thermal cyclers

Parafilm® Sealing Film, 100 mm Wide x 75 m Long	1 Roll	I 3080-1075

Filtration Funnels

Versatile!

STARLAB's polypropylene (PP) bottle-top filtration funnels for solvent filtration are an excellent way to purify solvents for all analytical applications. The one-piece PP construction ensures the funnels can withstand aggressive solvents. Made from FDA-grade materials, the PP filtration funnels are suited for the most demanding applications (such as food and drug industries).

Available with three different types of membrane (PES, Nylon, and PTFE), two different pore sizes (0.2 µm and 0.45 µm) and two funnel holding volumes (500 ml and 1000 ml).

Product features

- ▶ Filter diameter: 90 mm
- ▶ FDA-grade filter
- ▶ Compatible with CytoOne Filtration Pedestal and Cradle Ring
- ▶ Compatible with most laboratory GL45 bottles

Reagent Reservoirs

ChannelMate™ Reservoirs

Reagent reservoir refills save both waste and storage space. ChannelMate™ combines a sturdy reusable base with ultra-clear inserts to create a unique refillable reservoir system.

RNase, DNase and pyrogen free. Sterile.

Features

- ▶ Non-tipping, durable base features high-contrast volume graduations
- ▶ Skirtless polystyrene inserts require up to 40% less plastic and create minimal waste
- ▶ Nested inserts save up to 65% of the storage space required with other reservoirs
- ▶ Two systems: 25 ml & 100 ml (bases and inserts can be purchased separately)

CAPP® Origami Reservoirs

Made from durable polypropylene, these reservoirs are shipped and stored flat, ready to be flicked into shape. They are designed to the exact thickness to ensure that the reservoir remains standing once it has been folded into shape.

Features

- ▶ V-shaped bottom helps prevent bubbles forming in the pipette tips and also helps to avoid waste as more accurate amounts of reagent can be used
- ▶ Two capacities: 30 ml and 40 ml

Laboratory Labels

StarTags: One label you'll want to stick with!

Pre-cut labels that will accept any form of marker pen and will stick permanently in most conditions. StarTags are suitable for use in the freezer, centrifuge, waterbath, thermal cycler, shaker or vortexer. Laser sheets are available in some options, allowing you to print out large numbers of labels which is both time saving and convenient.

Features

- Suitable for autoclaving, boiling and freezing down to -85 °C
- StarTags Cryo can be used down to -196 °C
- Sticks permanently to all forms of tubes, plates, vials and bottles
- Leaves no sticky residue once removed

Laboratory ID Tape

Dispense with disorganisation!

Organise and identify your samples more easily by colour-coding with STARLAB ID Tape. There's plenty to choose from with two different lengths of tape in three different widths, and all in eight different colours.

Dispenser Features

- ▶ Custom-made acrylic dispenser which holds both lengths of tape
- ▶ Suction feet ensure the dispenser stays firmly on the bench, even when using one hand to dispense the tape
- ▶ Core inserts for 55 m long tape available separately

1. 12.7 m Tape – The internal aperture of the smaller rolls fit in the dispenser without the need for a Core Insert
2. 55 m Tape – The large rolls must have a Core Insert pushed into the aperture for use in the dispenser
3. Core Insert

ID Tape Core Inserts, Pack of 5 (For use with 55 m long tapes)	E9026-2005
Dispenser dimensions (WxDxH): 205 x 185 x 125 mm.	

ID Tape Features

- ▶ Suitable for use in the freezer, the fridge, the incubator and in the autoclave (-20 °C to 121 °C)
- ▶ Use on glass, plastic, metal, paper, rubber and any other dry surface
- ▶ Oil, water and acid resistant
- ▶ Paper-based tape that can be written on with pen, pencil or Lab Marker
- ▶ Leaves no adhesive residue when removed
- ▶ Available in individual rolls or in economical multi-packs of eight (one of each colour)

BMP™ 21-LAB Label Printer

Faster labelling!

Simple to operate and quick to print, the BMP™ 21-LAB label printer is an economical, must-have labelling tool especially designed for laboratory usage. With this thermal transfer printer you can create your labels just once – knowing they'll stay stuck and stay legible.

PRINTER SPECIFICATIONS	
Print Method	Thermal Transfer (Durable, Non-Smearing)
Display	LCD
Max. Label Width	19 mm
Max. Print Width	16 mm
Print resolution (dpi)	203
Barcoding	Yes, 1D (Linear, on 19.1 mm labels only)
Keyboard	ABC
Memory	Stores 12 files
Power Source	6 x AA Batteries (not incl.) or AC (optional adaptor)
Agency Approval	Printer: FCC Class B Approved Labels: UL and CSA Approved
Weight	0.75 kg
Dimensions	125 x 50 x 235 mm

Features

- ▶ Smudge-resistant thermal transfer printing
- ▶ Preprogrammed vial sizes (0.6; 1.5; 2.0; 15; 50 ml)
- ▶ Time/date stamp
- ▶ 44 symbols including greek letters and lab-specific 3-line, safety signs
- ▶ Barcoding
- ▶ Automated data serialisation (including multiple copy and increment options)
- ▶ Font options: six sizes (6, 9, 14, 20, 28 & 40 pt) plus auto sizing, and bold
- ▶ Ergonomic cutter on both sides which holds the label until you need it
- ▶ Internal memory for storing, retrieving and deleting label files
- ▶ Quick and easy cartridge loading
- ▶ Six languages
- ▶ Different label materials are available (Vinyl, Polyester, Polypropylene and Nylon)
- ▶ Backlit LCD display
- ▶ Automatic shut-off saves batteries

Easy to load cartridge.
Just drop, lock and go!

¹ B-461 is acceptable for use in liquid nitrogen only if the ends of the label overlap. All labels 6.4 m long, except N7519-4999 which is 4.8 m long.

Coloured labels (B-595) for general labelling

LABEL MATERIAL SPECIFICATIONS	
B-461 Polyester	Very low profile to prevent vials jamming in centrifuge or racks. Good solvent resistance. Stays put in the harshest conditions. Uses: • Liquid nitrogen (-196°C) • Freezer (-80°C) • Hot water bath (100°C) • Autoclave (121°C)
B-499 Nylon	Ideal for general purpose labelling, the permanent adhesive and thicker construction makes this material durable yet easy to handle. Uses: • Liquid nitrogen (-196°C) (not on glass) • Freezer (-80°C) • Autoclave (121°C)
B-488 Polyester	With permanent adhesion, outstanding chemical resistance and write-on capabilities, this material performs in the very harshest lab environments. Uses: • Freezer (-80°C) • Autoclave (121°C)
B-7425 Polypropylene	Resistant to extremely low and high temperatures, withstand even the transfer from liquid nitrogen to boiling water. Uses: • Liquid-Nitrogen (-196°C) • Freezer (-80°C) • Hot water bath (100°C) • Autoclave (121°C)
B-595 Vinyl	Durable and flexible vinyl film with permanent acrylic pressure-sensitive adhesive that can be applied at cold temperatures (down to -18°C). Uses: • Freezer (-40 °C)

CytoOne® – for optimum cell growth and handling

Cell culture performance ware – your cells deserve the best!

CytoOne® offers certified testing and consistent surfaces made from optically clear, premium grade polystyrene.

CytoOne® also offers convenience with features like grippers on dishes and plates for secure handling, easy to open resealable packaging on flasks, and complete 360° chimney wells on plates to prevent cross contamination.

CytoOne® is available for adherent and suspension cells grown in dishes, flasks or plates. Outfit your cells with CytoOne® cell culture performance ware for optimum growth and handling.

The CytoOne® Filtration Systems are perfect for fast and contamination-free sterile filtration of cell culture media.

CytoOne®

CytoOne® testing and quality assurance

CytoOne® flasks, dishes, and plates are gamma sterilised and certified free of detectable RNase, DNase, DNA and Pyrogen. CytoOne® is produced in a cleanroom environment.

CytoOne® products are put through stringent testing:

- ▶ Culture tests are performed to assure proper cell attachment and growth
- ▶ Every flask is pressure tested for leak-free assurance
- ▶ Flasks, plates and dishes are tested for wettability and flatness, and visually inspected to eliminate defects and scratches

Outfit your cells for true performance with CytoOne®.

 www.starlab.click/cytoone

STARLAB Quality

As an ISO 9001 and 14001 certified company, working procedures and processes at STARLAB are checked and audited regularly and the quality of our products is continuously monitored.

CytoOne® Dishes

Secure handling

Available with tissue culture treatment for optimum cell attachment and growth or non-treated for suspension cultures. Bevelled outer edges on the 35 mm and 60 mm dish bases make these small dishes easier to handle without accidentally displacing the lids, even when stacking. The lids of the 150 mm dishes have four ergonomically placed grip tags for secure handling with less hand strain.

Product features

- ▶ Sturdy, flat bases resist bowing and warping
- ▶ Stacking rings with vented design for thermal equalisation
- ▶ Vented lids improve gas exchange
- ▶ All CytoOne dishes have untreated lids to minimise condensation
- ▶ Easy to open sleeves in convenient small pack sizes
- ▶ Gamma sterilised (SAL 10^{-5}) and certified RNase, DNase, DNA and pyrogen free

 www.starlab.click/dishes

The lids of the 150 mm dishes have four ergonomically placed grip tags (circled above) for secure handling with less strain

Bevelled base on the 35 mm and 60 mm dishes makes it easier to pick up these small dishes without accidentally losing the lower shell

CytoOne® Multiwell Plates

Tissue culture treated plates

- ▶ Provide optimum cell attachment and growth
- ▶ Suitable for both single-cell isolation work and upscaling

Non-treated plates

- ▶ Ideal for hybridoma or lymphocyte culture
- ▶ Suitable for both single-cell isolation work and upscaling

One-way fit lids with condensation rings prevent cross contamination

Premium plates

Choose tissue culture treated plates for optimum cell attachment and growth or non-treated for suspension cultures. The non-reversible lids have condensation rings to minimise contamination and are vented to improve gas exchange. Lids also feature support tabs that minimise surface contact when set aside or propped open and a frosted writing surface at one end for labelling.

All plates are manufactured from crystal clear premium grade, nontoxic virgin polystyrene and are supplied individually wrapped with the lot number on the packaging.

Product features

- ▶ Complete 360° chimney wells prevents crosscontamination and provides uniform temperature transfer across all wells
- ▶ Vented skirt reduces condensation and surface tension between stacked plates
- ▶ Optical clarity provides distortion-free microscopy
- ▶ Moulded alpha-numeric matrix
- ▶ Gamma sterilised (SAL 10⁻⁵) and certified RNase, DNase, DNA and Pyrogen free

Minimising the 'edge effect' with CytoOne®

CytoOne® plates have chimney wells with a complete 360° open channel around each well. Filling the channels with medium during incubation helps reduce clumping of cells towards the edges, resulting in a more uniform cell layer.

Cell growth in a CytoOne® plate with the channels between the 360° chimney wells left empty.

Cell growth in a CytoOne® plate with the channels filled with DMEM medium shows a marked reduction in 'edge effect'.

Media Volumes to add to each plate:

- ▶ 6-well: 15–20 ml
- ▶ 12-well: 20–25 ml
- ▶ 24-well: 20–25 ml
- ▶ 48-well: 20–25 ml
- ▶ 96-well: 10–12 ml

Tests were carried out on six other brands of 96-well tissue culture plates which were seeded and incubated under the same conditions as CytoOne®. All display an edge effect which could affect the integrity of our your data. Download the Product Data Sheet for full details: www.starlab.click/edgeeffect

CytoOne® Flasks with 2-Position Plug Seal Caps

Pressure tested

Choose tissue culture treated for optimum cell attachment and growth or non-treated for hybridoma and suspension cultures. The two-position plug seal cap lets you choose secure manual venting or an airtight seal. Flasks feature convenient moulded volume graduations and frosted writing surfaces. The T-25, T-75, and T-150 flasks have traceable lot numbers etched into the base.

Product features

- ▶ All flasks 100% pressure tested for leak-free assurance
- ▶ Stacking rims with vented design for thermal equalisation
- ▶ Anti-tilt skirts and base bars improve stability
- ▶ Wide necks provide easy access while minimising contamination
- ▶ Gamma sterilised (SAL 10^{-5}) and certified RNase, DNase, DNA and Pyrogen free

Cell Scrapers

CytoOne

Rich harvest!

CytoOne® scrapers comprise a gentle silicone blade and an ABS polymer handle for easy handling inside flasks. They are available in three sizes for cell harvesting in a variety of dishes, flasks or plates:

- ▶ 11 mm fixed blade with 220 mm straight handle for plates and dishes
- ▶ 10 mm pivoting blade with 250 mm single angle handle for small flasks
- ▶ 12 mm pivoting blade with 320 mm dual angle handle for larger flasks

Product features

- ▶ Silicone blade gently raises / lifts the cells from the surface so fewer cells are destroyed
- ▶ Soft silicone ensures better contact between the blade and the surface of the flask, dish or plate
- ▶ Pivoting blades pivot the full 360° around the handle for easy access to flask corners
- ▶ Flexible ABS handles for easy handling inside flasks
- ▶ Gamma sterilised (SAL 10⁻⁵)

15 ml and 50 ml Centrifuge Tubes

STARLAB's new centrifuge tubes are designed for the centrifugation of cells, but can be used for standard centrifugation, preparation and storage applications. USP Class VI polymers and certified non-toxicity ensure the viability and integrity of cells. The sterility of assurance level (SAL) of 10^{-6} fulfills the highest demands on sterility, meeting EN 556-1 standard (Sterilisation of Medical Devices). Racked tubes are delivered in recyclable cardboard racks.

Maximum centrifugation rates: Conical Tubes 15 & 50 ml: 12,000 x g and Skirted Tube 50 ml: 6,000 x g

Product features

- ▶ Clear, sterile polypropylene tubes with green HDPE screw caps
- ▶ White writing surface and clearly printed graduations
- ▶ Longer length screw caps with sealing ring prevent any leakage
- ▶ Perfect for centrifugation of cells: USP Class VI, non-cytotoxic and sterile (SAL 10^{-6}) material
- ▶ Certified RNase, DNase, DNA and Pyrogen free

Racked tubes are supplied in recyclable cardboard trays

Cell Strainers (Sterile)

STARLAB Cell Strainers are intended as a fast, easy, and simple alternative to traditional filtration when dissociating stem cells and other tissue-derived primary cells. They yield consistently uniform, single-cell suspensions that are ideal for preparation of samples for flow cytometry, Fluorescence-Activated Cell Sorting (FACS), and other applications related to cell separation. Available in 40 μm , 70 μm , and 100 μm color-coded mesh variants. Cell strainers are made from USP Class VI materials.

Product features

- ▶ Uniform nylon mesh size of 40 μm , 70 μm , and 100 μm (colour-coded)
- ▶ Extended lip on the strainer enables aseptic handling with forceps
- ▶ Designed to fit into a 50 ml conical centrifuge tube
- ▶ RNase, DNase and Pyrogen free
- ▶ Gamma sterilised

Syringe Filters (Sterile)

Nearly half the hold up volume of some other syringes on the market!

STARLAB's Syringe Filters are an economical choice due to the maximum recovery of your solution. Manufactured using the latest technology, these 33 mm diameter filters are suitable for volumes 10–200 ml. Use for cell culture media and additives, biological solutions and buffers.

Product features

- ▶ High bubble point membrane provides tighter pore size for greater security
- ▶ High burst pressure ensures safe operation
- ▶ Large filtration surface area allows you to filter your sample more easily
- ▶ Low hold-up volume provides maximum recovery of your solution
- ▶ Surfactant-free membrane for cleanliness in downstream applications

STARLAB Syringe Filters have nearly half the hold-up volume of some competitor syringe filters which means a lot less expensive media being wasted / held up in the syringe. Use our Syringe Filters just 20 times to save up to 140 µl - just think of the savings you'll make over the course of a month, a year.

CytoOne® Bottle Top Filtration Units

Easy going!

The patented, innovative CytoOne® Bottle Top Filtration Units feature a High Flow Velocity PES (Polyethersulfone) membrane that is perfect for filtering Fetal Bovine Serum (FBS) and other viscous solutions. The membrane is low protein binding and surfactant-free.

CytoOne® Bottle Top Filtration Units are available in 250 ml, 500 ml and 1000 ml complete systems or funnel-only. All units are sterile and manufactured from USP Class VI polystyrene in an ISO 13485 clean room, FDA regulated facility.

CytoOne® is compatible with the patented CytoOne® Pedestal and Cradle Ring. These optional docking stations provide hands-free filtering and a stationary vacuum hose connection, allowing for efficient set-up and quick use while preventing spills and contamination features in the hood.

Product features

- ▶ Suitable for the sterile filtration of tissue culture and microbial media, buffers, reagents and other laboratory solutions
- ▶ Available as a complete system or funnel-only
- ▶ Patented SECUREgrasp™ cap provides a convenient gripping surface plus a frosted area for labeling
- ▶ Ergonomic bottle shape with moulded finger grips
- ▶ Sterile (SAL 10⁻⁶) and certified non-cytotoxic and pyrogen free

1. Dust cap with writing surface
2. Large raised volume graduations
3. Low protein binding PES filter with large surface area
4. Skirted funnel base surrounds the Quick-Connect™ Pedestal or the Cradle Ring for secure hands-free filtration
5. Sloping contour with additional head space
6. Finger grip areas
7. Wide stable base
8. SECUREgrasp™ cap with flat writing surface and no-slip edges

CytoOne® Quick-Connect™ Vacuum Filtration Pedestal	1	CC6000-1116

Cradle Ring for use with all filtration units for hands-free filtration

Quick-Connect Vacuum Filtration Pedestal shown with 500 ml Bottle Top Filtration Unit. Use for easy, hands-free filtration.

CytoOne® Centrifuge Tube Filtration System

Freedom!

STARLAB has developed the world's first hands-free centrifuge tube filtration system. Each filtration unit includes a sterile centrifuge tube and cap, 50 ml funnel with PES membrane, funnel adapter (for the 15 ml tube assembly), vacuum hose adapter, and dual centrifuge tube stand.

The CytoOne® Centrifuge Tube Filtration System is used for the sterilization of tissue culture and microbiological media, FBS, buffers, reagents, and other laboratory solutions. This system avoids potential contamination by eliminating any unnecessary fluid transfer to the centrifuge tube poststerilization, and also reduces the risk of spills.

This hands-free filtration system works in conjunction with the Quick-Connect™ Pedestal or Cradle Ring which provides on/off vacuum flow control. Quick-Connect™ Pedestal and Cradle Ring provide a permanent vacuum hose connection. A time-consuming change of the vacuum hose connection from one unit to the next is not necessary. Both CytoOne® Centrifuge Tube Filtration Units are offered as ready to use full assemblies including centrifuge tubes.

Product features

- ▶ Available in 15 ml and 50 ml centrifuge tube sizes
- ▶ 0.2 µm or 0.45 µm membrane
- ▶ Permanent vacuum hose connection to minimize set-up time
- ▶ Certified non-cytotoxic and pyrogen-free
- ▶ Sterile (SAL 10⁻⁶)

1. 50 ml filtration funnel with forward-facing and raised graduation marks for easy reading
2. 0.2 µm asymmetric membrane filter pore size
3. 15 ml CytoOne® Centrifuge Tube Filtration Unit
4. 50 ml CytoOne® Centrifuge Tube Filtration Unit
5. Quick connection to vacuum system
6. Vacuum hose adapter
7. Quick-Connect™ Pedestal base for hands-free filtration
8. On/off vacuum flow control

Ice Bath / Floating Rack

A versatile rack that can be used as a self-contained ice bath or used in the waterbath. Use the rack in the hinged storage box supplied and pack with ice; or take it out to float in the water bath—the moulded-in buoys give the racks exceptional stability.

- Holds 24 x 1.5/2.0 ml tubes, or 14 x 0.5 ml tubes, or a combination of both
- Temperature use: -80 °C to 121 °C. Autoclavable

Stainless Steel Freezer Racking

Freezer racking for standard storage boxes up to 136 x 136 x 55mm

These Stainless Steel (SS) racks for upright or chest freezers are designed for use with standard storage boxes and racks.

The freezer racks on this page are suitable for use with:

- ▶ The StarStore 130 x 130 mm range of storage boxes on page 100
- ▶ The 50 mm high cardboard storage boxes on page 102
- ▶ The cryogenic storage boxes specified on pages 102–103
- ▶ StarRack 64 on page 106
- ▶ Any storage box up to 136 x 136 x 55mm

Aluminium Freezer Racking

Flexibility and freedom for your freezer!

These aluminium racks are recommended for all applications where a flexible storage solution is needed. The adjustable shelves allow the rack to be used for all heights of storage boxes with a maximum footprint of 138 x 138 mm.

Each rack is supplied with the number of shelves stated in the table below and a locking rod for securing the boxes in the rack. Additional shelves are available separately so you have the flexibility of purchasing only the shelves that you need, according to the number and height of the boxes you want to store in your chest freezer.

Mixer HC

CE

Mixing. Heating. Cooling. Timing. All combined in one unit to speed up your daily tasks

The Mixer HC is suitable for a wide range of applications due to the selection of exchangeable thermoblocks (sold separately) available for commonly used vials and plates. The powerful motor mixes up to 1500 rpm while the precise thermal element heats samples up to 99° C or cools them down as far as 13° C below room temperature. The intuitive setting of parameters and simple programming makes the Mixer HC very easy to use, with all parameters summarized on one, easy to read display. The robust construction despite its small footprint makes the Mixer HC your new companion for your daily lab work.

Nine exchangeable thermoblocks (sold separately) for a wide range of tube and plate formats are available. The Mixer HC offers precise temperature control and broad temperature range for reliable and reproducible sample preparation

Product features

- ▶ Mixing, heating, cooling and timing combined in one instrument
- ▶ Automatic thermoblock recognition simplifies block exchange
- ▶ PROGRAM mode for creation of individual protocols
- ▶ SHORT MIX function for instant mixing at the push of a button
- ▶ INTERVAL MIX function for alternating between mixing and resting

The Iso-Rack – Easy handling of multiple samples

Ideal for time-critical applications and high throughput sample preparation, the Iso-Rack holds 24 tubes that can be transferred into a block in a matter of seconds. Available for 0.5 ml and 1.5/2.0 ml microcentrifuge tubes.

Exchangeable Thermoblocks

Nine different thermoblocks are available for a wide range of applications, covering tube volumes from 0.2 ml up to 50 ml as well as SBS format plates.

A perfect match – TubeOne® microcentrifuge tubes

TubeOne® tubes stay sealed during boiling, freezing or centrifuging, and are still easy to open afterwards! Optically clear, the tubes also feature a frosted writing surface. Visit www.starlab.click/tubeone or see page 50 for more information

Aspirator

Use two hand controllers without any loss of performance

The STARLAB Aspirator is designed for the safe and efficient aspiration of fluids. The vacuum level and suction power is adjustable in eight steps, ranging from 150 to 850 mbar for safe and reproducible working. The chemically-resistant pump automatically switches on/off to reduce noise level in the workplace. The ergonomically-designed hand controller is fully autoclavable. Collection containers are available in two options; 4 L polypropylene and 2 L glass bottles. Additionally, the Aspirator can be used as a mobile vacuum source for sterile filtration and solid phase extraction.

Product features

- ▶ The powerful pump can operate two hand controllers without any loss of performance
- ▶ Chemically-resistant, high performance pump with long service life
- ▶ Ergonomic, fully autoclavable hand controller
- ▶ Auto ON-OFF pump switch with low noise emission for a quieter working environment
- ▶ Intuitive, reproducible adjustment of suction power via touch panel

Easy to handle

Pressing the lever allows fine adjustment of the suction power. Permanent suction can also be enabled.

8-channel tip adapter

The 8-channel adapter for 200 µl and 300 µl pipette tips is the perfect choice for working with cell-culture plates.

Hydrophobic Filter

Hydrophobic filter prevents contamination of environment and provides overflow protection.

Quick coupling

Autoclavable, self-sealing quick couplings allow safe decontamination of biological risks.

Rotator Mixer Multi 1

Product features

- ▶ Controlled sample inverting
- ▶ Programmable
- ▶ Three different motions
- ▶ Variable speed and timer
- ▶ Low profile and small footprint

Mix it up!

Compact and multifunctional, the programmable Rotator Mixer Multi 1 provides thorough mixing of microtubes with consistent results. The rotator is designed for mixing applications including cell suspensions, incubations, extraction procedures, gel washing and precipitations.

The three different motions – vertical rotation, reciprocal motion and vibration – can be used separately or combined, as well as variable speed and timer functions.

Supplied with a standard platform for 26 tubes up to 15 mm diameter (eg. 1.5 ml, 2.0 ml and 15 ml tubes), STAR-LAB's Rotator Mixer is a practical aid for your daily mixing tasks. An optional platform, for five tubes up to 30 mm diameter (eg. 50 ml tubes) and 12 tubes up to 15 mm diameter, is available separately.

Microplate Mixer

Compact and versatile!

This microplate mixer is ideal for the mixing and shaking of any skirted plate (PCR, Cell Culture, Deepwell, Microtitre and Microplates). The mixer can hold either one or two plates, depending on the attachment being used, and can also mix tubes with the special tube adapter accessories. The stepless, variable vibration speed is excellent for applications such as the resuspending of pellets. The small footprint saves space on your bench.

Product features

- ▶ Suitable for use with all skirted plates with SBS footprint
- ▶ Wide range of speed from 0 to 1500 rpm
- ▶ Small footprint
- ▶ Stepless speed control
- ▶ Various accessories for microtitre plates and tubes

Tube Roller

Rock and roll!

Simultaneous rolling and tilting movements ensures thorough mixing. The tube roller is built for continuous operation and is suitable for applications such as hybridisation. The unit offers variable speed control and features a sturdy and robust construction.

Product features

- ▶ Simultaneous rolling and tilting motion
- ▶ Continuous operation
- ▶ Speed control
- ▶ Six rollers to hold a load up to 4 kg
- ▶ Easy to use

	Tube Roller	1	N2400-7010

2-year warranty

TECHNICAL SPECIFICATIONS	
Speed Range	0 – 70 rpm
Max. Load	4 kg
Type of movement	Orbital
Unit Material	Polyoxymethylene
No. of rollers	6
Power supply	100 – 240 V, 50/60 Hz
Max. power consumption	25 W
Permissible ambient temperature	4 – 40 °C
Dimensions (W × D × H)	260 × 460 × 120 mm
Weight	4.5 kg
Permissible Relative Humidity	< 80 %
Size of rollers	280 x 30 mm

A perfect match – Centrifuge Tubes

For more details:
see page 59 or visit
www.starlab.click/centrifugetubes

Vortex

Simple and smart!

An economical vortex for quick and convenient mixing of small sample volumes. Supplied with a universal cup for tubes or vessels up to 30 mm, the vortex also has a range of accessories to allow the mixing of various tube sizes as well as skirted plates.

The variable speed provides the gentle mixing of samples up to higher speeds for vigorous mixing and resuspending cells or pellets. Anti-slip feet ensures stability on the bench during mixing.

Product features

- ▶ Variable speed control up to 2500 rpm
- ▶ Two operating modes: continuous and touch
- ▶ Wide range of accessories
- ▶ Anti-slip, vacuum suction feet
- ▶ Small footprint

ORDER INFORMATION			
	Description	Pack Size	Cat. No.
	Vortex	1	N2400-6010
Accessories			
	Vortex Replacement Universal Cup	1	N2400-6011
	Tube Adapter for 15 x 1.5/ 2.0ml Tubes ¹⁾	1	N2400-6012
	Tube Adapter for 8 x 15ml Centrifuge Tubes ¹⁾	1	N2400-6013
	Adapter for 96 Well Microplates	1	N2400-6014
	Vortex Adapter Plate	1	N2400-6015
¹⁾ N2400-6012 and N2400-6013 can only be used as an attachment in combination with N2400-6015.			

Vortex is supplied with an universal cup for tubes (N2400-6011) as shown in main image. N2400-6012 and N2400-6013 can also be used as an attachment on the Microplate Mixer (see page 66) in combination with its adapter N2400-8043.

2-year warranty

TECHNICAL SPECIFICATIONS	
Speed Range	0 – 2500 rpm ¹⁾
Max. Load	0.5 kg
Type of movement	Orbital
Orbital Diameter	4 mm
Operation	Two: touch and continuous
Unit Material	Epoxy painted zinc alloy
Power supply	110 – 230 V, 50/60 Hz
Max. power consumption	60 W
Permissible ambient temperature	4 – 40 °C
Dimensions (W x D x H)	127 x 130 x 160 mm
Weight	3.5 kg
Permissible Relative Humidity	< 80 %
¹⁾ 2500 rpm max. speed only with Universal Cup attachment supplied with unit. When using the optional adapters, max. speed is 1300 rpm.	

 www.starlab.click/vortex

Vortex IR

Vortex IR sensor mode

The Vortex IR can be set to Sensor Mode so the infrared detects the presence of the tube and automatically starts vibration

Simple, but revolutionary!

The Vortex IR incorporates an optional infrared (IR) motion detector which automatically starts the vibration when a tube crosses the sensor field.

The variable vibration speed allows low speeds for the gentle mixing of samples or higher speeds for vigorous vortex mixing and the resuspending of cells or chemical pellets.

Product features

- ▶ Variable speed control up to 3000 rpm
- ▶ Continuous mode, or sensor mode that automatically starts vibration
- ▶ No pressure needed to maintain vibration
- ▶ Low-profile design
- ▶ Wide range of accessories

ORDER INFORMATION			
	Description	Pack Size	Cat. No.
	Vortex IR	1	N2400-0001
Accessories			
	Foam Attachment for 19 x 1.5 ml Tubes	1	N2400-1001
	Foam Attachment for 5 x 15 ml Tubes (16 mm)	1	N2400-1002
	Foam Attachment for 4 x 50 ml Tubes (29 mm)	1	N2400-1003

Orbital Shaker

Shake it all about!

The orbital shaker has two operating modes: continuous or timer. The digital speed and timer displays ensure ease of use. It provides the orbital shaking of your samples from a gentle agitation up to a vigorous orbital motion. The orbital shaker is suitable for a wide range of molecular biology or immunology applications.

The Orbital Shaker is NOT supplied with a platform. Two platforms are available and sold separately so you can customise your shaker to your requirements.

Product features

- ▶ Gentle agitation up to vigorous orbital motion
- ▶ LCD displays for speed and time
- ▶ Two operating modes: continuous and timer
- ▶ Choice of two platforms available
- ▶ Holds load up to 7.5 kg

ORDER INFORMATION			
	Description	Pack Size	Cat. No.

Rocking & 3D Rocking Shakers

Shaken, not stirred!

STARLAB offers two similar shakers but with different movements: see-saw rocking or 3D. Both shakers have a fixed tilt angle and provide two shaking modes: continuous or timer. The digital speed and timer displays ensure ease of use. Both shakers are supplied with a platform with bungee cords.

An alternative platform with clamping rolls is available separately, making these shakers suitable for a wide range of applications including blotting, cultivation and incubation techniques.

Product features

- ▶ See-saw rocking or 3D mixing
- ▶ Easy to use
- ▶ LCD displays for speed and time
- ▶ Two operating modes: continuous and timer
- ▶ Alternative platform available

Magnetic Stirrer

Simple but effective!

Ideal for applications such as buffer preparation, this value for money magnetic stirrer has a compact footprint. Easy to use and built to last, the sturdy construction guarantees reliable stirring with the adjustable stirring speed. The unit is supplied with a 40 mm magnetic stir bar.

Product features

- ▶ Variable speed range 100 - 1500 rpm
- ▶ Stirring volume up to 3 litres
- ▶ Includes 40 mm stir bar
- ▶ Compact design
- ▶ Easy to Clean

ORDER INFORMATION			
	Description	Pack Size	Cat. No.

Speed Range	100 – 1500 rpm (10 rpm steps)
Max. stirring volume	3 l
Plate Diameter	135 mm
Power supply	100 – 240 V, 50/60 Hz
Max. power consumption	15 W
Permissible ambient temperature	4 – 40 °C
Dimensions (W × D × H)	155 × 215 × 75 mm
Weight	0.9 kg
Permissible Relative Humidity	< 80 %

Magnetic Stirrer with Heating

Stir up some heat!

This magnetic stirrer has very fast temperature ramping to help save your time. The ceramic-coated plate ensures an even temperature and has a high resistance to chemicals. It is ideal for many applications including the preparation of solvents at high temperatures. Supplied with a 40 mm magnetic stir bar, the stirrer is easy to use and has a clear LED display showing temperature and speed.

Product features

- ▶ Fast temperature ramping saves time
- ▶ Speed and temperature LED Display
- ▶ Hotplate safety warning light
- ▶ Chemically-resistant ceramic-coated plate
- ▶ Includes 40mm stir bar

Mini Dry Bath Incubator

Tiny, but powerful!

A very small yet powerful unit suitable for a range of applications. The digital microprocessor controls the preset temperature of the metal block and the fast ramping of temperature saves your valuable time. Supplied with a transparent lid for temperature uniformity, the unit can also be used as a mini water bath or bead bath.

Product features

- ▶ Microprocessor controlled temperature and timer
- ▶ Very small footprint
- ▶ Easy, user calibration
- ▶ Digital display
- ▶ Can also be used as a mini water or bead bath

Mini Fuge PLUS

Every bench should have one!

The Mini Fuge PLUS centrifuge is ideal for quick spin down of condensate, vortexed or thawed samples. Microfiltration and cell separation with a speed of 2000 x g is also possible.

Product features

- ▶ 8-place rotor for 0.2/0.5/1.5/2.0 ml tubes, including screw cap tubes
- ▶ 32-place strip rotor for 0.2 ml tubes or strips
- ▶ Quick, easy rotor change without the need for tools
- ▶ Option of electronic braking or gradual spin stop
- ▶ Second lid switch for added safety

Plate Centrifuge

You spin me round!

The plate centrifuge makes the safe and quick spin down of droplets and condensation very easy. Sealed plates are loaded vertically and surface tension keeps samples in place so there is no danger of spilling samples. The centrifuge accepts all plates up to 25 mm high. An optional adaptor is available for centrifuging 48-well PCR plates and 0.2 ml PCR tubes or strips.

Product features

- ▶ Less than quarter the size of most plate centrifuges
- ▶ Accommodates two plates
- ▶ Rapid start to stop
- ▶ Use before and after thermal cycling to increase PCR yield
- ▶ Accepts *skirted*, *semi-skirted* and *non-skirted* plates

A perfect match – PCR Plates

STARLAB offers a comprehensive range of high-quality PCR plates that provide reproducible results.

For full details:

See pages 66–69 or visit
www.starlab.click/pcrplates

PCR Cabinets

Get results – not background!

AirClean® Systems PCR Workstations are designed as application solutions for the manipulation and amplification of RNA and DNA. Cross-contamination during amplification of RNA and DNA can lead to results that are inaccurate — results that cost you valuable time and consume expensive reagents.

AirClean® Systems PCR Workstations offer a controlled environment for PCR applications to improve the odds for getting accurate results.

Product features

- ▶ UVTect™ microprocessor monitors the life of the consumables so you know they are working effectively
- ▶ Polycarbonate design to reflect UV energy
- ▶ Folding sash for full and easy access
- ▶ One piece construction ensures no UV energy can escape
- ▶ Supplied ready-assembled – just plug and play!

AirClean® Systems
"THE FUME CONTROL EXPERTS"

Pre-filtration

Pre-filtration of gross particles via the electrostatic prefilter prolongs the life of the HEPA filter (Laminar Flow models only).

HEPA filter

HEPA filter for Class 100 (ISO 5) particulate-free environment (Laminar Flow models only)

AirClean display

UVTect™ microprocessor controller monitors the life of the consumables so you can be sure both your filter and UV bulb is working effectively

Sash overlap

Sash overlap eliminates potential exposure to harmful shortwave UV irradiation

Built-in safety

Built-in safety switch automatically shuts off the UV light (and turns on the blower when the sash is opened - Laminar Flow models only)

UV reflection

Constructed from polycarbonate which reflects UV light to efficiently irradiate all surfaces and objects within the cabinet. Polycarbonate does not turn yellow and crack over time in the way cabinets made from acrylic often do

Internal shelf

Shelf situated directly under UV lamp so your critical items are close to the UV energy source

Flat polypropylene base

Flat polypropylene base for easy and comfortable use during pipetting – no uncomfortable ledges to lean on!

Slip hatch

Convenient slip hatch for equipment leads; keeps them tidy and away from your working area

Trolley stand

Optional trolley stand available (Height:32")

StarGuard®, ErgoOne®, TipOne® & TubeOne® - The perfect match

1

StarGuard® Gloves

STARLAB is committed to providing the best hand protection available. Regardless of the application and user preferences, our four StarGuard® disposable gloves offer daily protection in the laboratory without sacrificing comfort.

 www.starlab.click/starguard

2

ErgoOne® Pipettes

ErgoOne® provides you with accuracy and precision you can trust, and a stylish new look you will love. Lightweight and extremely easy to use, ErgoOne® can be trusted to provide accurate and precise pipetting all day, every day. Use with STARLAB's TipOne® Tips for the perfect pipetting partnership.

ErgoOne® is designed to fit all popular pipette tips without any loss of accuracy or precision.

 www.starlab.click/manualpipettes

3

TipOne® Pipette Tips

TipOne® is the original refillable, reusable and recyclable pipette tip system. Recent improvements to the design of the system, based on customer-feedback, is why TipOne® is one of the leading tips for research labs.

Convenience and quality are at the heart of the system and TipOne® remains the same tip that you have used and trusted over the years.

 www.starlab.click/tipone

4

TubeOne® Tubes

TubeOne® tubes stay sealed during boiling, freezing or centrifuging, and are still easy to open afterwards!

Optically clear without compromising structural integrity, the tubes feature a frosted writing surface.

Your Personal Protection

Providing certified protection

Our range of StarGuard® gloves are in compliance with the highest EN safety standards. For the newest EN ISO 374-1, all gloves are classified as Type B and therefore belong to a high protection class against chemicals and micro-organisms. Two of our gloves have an **Acceptable Quality Level (AQL) of 0.65**.

All gloves have been tested against a variety of chemicals to EN16523-1:2015 standards (see *Chemical Break-through Times* available separately). For EN ISO 374-5, they also fulfill the ISO 16604:2004 which states the protection against bacteria, fungi and virus.

STARLAB is committed to providing the best hand protection available. Regardless of the application and user preferences, our four StarGuard® disposable gloves offer daily protection in the laboratory without sacrificing comfort.

Choose the StarGuard® glove best suited to your daily demands:

COMFORT – for enhanced nitrile comfort and dexterity

PROTECT – for nitrile strength and durability

SENSITIVE – comfortable nitrile protection that is clinically proven to reduce the potential of contact dermatitis

TOUCH – if you prefer the secure grip and tactile sensitivity of latex

Manufactured to the highest standards

All StarGuard® gloves are manufactured to the highest standards and have been tested and certified by a third-party notified body.

ALL StarGuard® gloves are in compliance with:

- ▶ EU Regulation 2016/425, PPE Category III.
- ▶ European Medical Device Directive 93/42/EEC, Class I Medical Device
- ▶ EN 420:2003 General requirements for protective gloves
- ▶ EN ISO 374-1:2016 Protection against chemicals and micro-organisms
- ▶ EN 374-2:2014 Protection against penetration by micro-organisms
- ▶ EN 16523-1:2015 Permeation by liquid chemicals under conditions of continuous contact
- ▶ EN 374-4:2013 Determination of resistance to degradation
- ▶ EN ISO 374-5:2016 Requirements for micro-organisms risks
- ▶ ISO 16604:2004 Protection against penetration by blood-borne pathogens
- ▶ EN 455 Parts 1, 2 & 3 Medical gloves for single use

StarGuard® Comfort

EN ISO 374-1/Type B

EN ISO 374-5:2016

AQL
0.65

Recommended for use when:

- ▶ Work demands dexterity and tactile sensitivity
- ▶ You require a lightweight glove with exceptional fit
- ▶ You want to reduce hand fatigue caused by gloves
- ▶ Comfort and chemical protections needs to combine
- ▶ Testing or handling food stuffs

Combating hand fatigue

Hand fatigue not only severely impacts the work you do today, it can also have long-term ramifications. StarGuard® Comfort is recognised as an **Ergonomic Certified** glove that provides measurable ergonomic benefits to the user by improving comfort and fit, and minimising the risk factors that may contribute to ergonomic injuries.²⁾

Enhanced comfort by improved fit

An extremely soft and strong glove that provides improved tactile sensitivity to help reduce the risk of hand fatigue.

- ▶ Certified to minimise the risk of ergonomic hand injuries
- ▶ A thinner-feel nitrile glove, ideal for work that requires great dexterity
- ▶ Larger pack size helps the environment by reducing packing materials and transportation

PPE Cat. III Complex Design

Light Blue Nitrile Glove. Textured Fingers
Length: 245 mm. 250 Gloves per Box¹⁾

Improved fit and longer length

StarGuard® Comfort have snug fitting fingers and are 245 mm long to provide full cover over the wrist.

Comfortable ...

made from soft nitrile for enhanced comfort and tactile sensitivity

... yet Strong

an extremely soft but strong glove that provides excellent elasticity

 www.starlab.click/sg-comfort

StarGuard® Protect

AQL 0.65

Recommended for use when:

- ▶ Everyday protection requires strength and durability
- ▶ You need for excellent chemical splash protection
- ▶ A combination of protection and reliable, consistent grip is needed
- ▶ Protection is crucial while performing delicate tasks

Everyday protection from hazards

Nitrile gloves provide the best chemical splash resistance in a disposable glove, as well as excellent barrier protection against biohazards, water miscible substances, weak acids, and alkalis (pH 4–10), aliphatic solvents and grease.

Outstanding chemical breakthrough times

- ▶ Acrylamide (40%) > 480 mins
- ▶ Ethidium Bromide (5%) > 480 mins
- ▶ Gluteraldehyde (50%) > 480 mins

Strength and durability for reliable protection

A strong and comfortable glove that provides reliable protection against day-to-day laboratory hazards.

- ▶ Combines strength and durability for everyday protection
- ▶ Comfort, tactile sensitivity and consistent grip
- ▶ Excellent chemical splash protection
- ▶ Longer glove length (250 mm) covers the wrist

PPE Cat. III Complex Design

Violet-Blue Nitrile Glove. Textured Fingers
Length: 250 mm. 100 Gloves per Box

For everyday, reliable protection

The durable but soft material offers excellent comfort while performing delicate tasks, without compromising splash protection.

Longer!

250 mm long to provide splash protection for your hand and wrist

Strength and durability
hand protection you can rely on everyday

StarGuard® Sensitive

EN ISO 374-1/Type B

AQL 1.5

EN ISO 374-5:2016

Recommended for use when:

- ▶ Concerns with glove contaminants interfering with experiments or sensitive products must be eliminated
- ▶ Working in wet conditions
- ▶ The everyday use of small instruments demands a dexterous, lightweight glove
- ▶ Users have concerns regarding hand health
- ▶ Testing or handling food stuffs

Low Dermatitis Potential glove

StarGuard® Sensitive gloves have been clinically shown to **reduce the incidence of the redness and itching associated with contact dermatitis.**

They carry the US Food & Drug Administration (FDA) authorised claim for 'Low Dermatitis Potential'. StarGuard® Sensitive are extremely strong and comfortable, and an excellent choice for everyday use. You don't have to be susceptible to allergies to appreciate the quality and comfort of these gloves!

Accelerator-free hand protection for sensitive skin

A strong, lightweight glove that provides dexterity and comfort during long periods of wear, and is also kind to your hands.

- ▶ Low Dermatitis Potential – ideal for users with sensitive skin
- ▶ Contains no contaminants to interfere with experiments
- ▶ Textured fingers for improved tactile sensitivity
- ▶ Excellent grip in wet conditions

PPE Cat. III Complex Design
Blue Nitrile Glove. Textured Fingers
Length: 250 mm. 200 Gloves per Box

Excellent grip in wet conditions

A reduced amount of surfactants used during the manufacture of StarGuard® Sensitive results in an improved grip in wet conditions to rival that of latex gloves.

Comfortable

A lightweight glove that also provides exceptional strength

200 gloves per box

helps to conserve the environment by reducing packing materials, energy and fuel, and storage space

StarGuard® Touch

**AQL
1.5**

Recommended for use when:

- ▶ Durable comfort is required for lasting wear
- ▶ Working with blood-borne pathogens
- ▶ Secure and consistent grip is necessary for handling small instruments
- ▶ Tactile sensitivity is a must for working with a range of different instruments

Latex gloves provide the best elasticity in a disposable glove, as well as excellent barrier protection against blood-borne pathogens and other biohazards, water miscible substances, weak acids, and alkalis (pH 4–10).

Secure grip and tactile sensitivity

StarGuard® Touch is a comfortable, fully-textured latex glove that provides a secure, consistent grip and excellent tactile sensitivity.

- ▶ Excellent grip in both wet and dry conditions
- ▶ Great elasticity for comfort during long periods of wear
- ▶ Ideal for work that requires great dexterity

PPE Cat. III Complex Design
Natural Latex Glove. Fully Textured
Length: 245 mm. 100 Gloves per Box*

Secure, latex grip

Latex gloves are ideal for work with small instruments. StarGuard® Touch are fully textured for a secure, consistent grip with the tactile sensitivity of latex.

STARGUARD*select*

How to find the right protection for each application

If you are concerned which gloves are the right ones to use for your laboratory work, then we can help.

STARGUARD*select* can help you make the right decision quickly.

STARGUARD*select* will provide you with your personal protection solution in just a few clicks.

Go to www.starlabgroup.com/starguardselect

How it works:

A page will open with a list of chemicals that have been tested against our StarGuard® gloves. Select the chemicals which pose the most hazard to you, and click on Next.

A list of the optimal gloves for the chemicals selected will be shown. You can also request your StarGuard® sample.

Glove Box Dispenser

Free up your valuable bench space by mounting the glove dispenser to the wall. The epoxy-coated steel wire rack holds three boxes of gloves and is suitable for use with most brands and sizes of box. Supplied with fixings for wall mounting.

- ▶ EN 388 (93-260 only)
- ▶ European Medical Device Directive 93/42/EEC, CE Class 1
- ▶ EN 455 Parts 1, 2 & 3
- ▶ ASTM F1671 protection against penetration by blood-borne pathogens

IMPORTANT: See individual product information for full list of standards that apply to each specific glove.

Microflex® Gloves

XCEED – Comfortable ergonomic nitrile protection

A combination of exceptional comfort and strength.

Recommended for use when:

- ▶ Work demands great dexterity and you need a glove to reduce hand fatigue
- ▶ You are looking for significantly stronger protection
- ▶ Working in environments that demand consistent grip and reliability
- ▶ Using Ethidium Bromide (Breakthrough: >480 mins)
